FRIDAY, AUG. 11, 1871.

THE GREAT MUSICAL JUBILEE.

For which Gilmore is now making preparation, (and which is announced to occur in Boston in June, 1872, to commence the 17th and close July 4) in its conception is unique and grand, and its execution will be the most brilliant and grand ever witnessed in the world, embracing as it does, the finest musical talent of every civilized nation. In order to carry out the proposed festival in all its fulness, it is necessary that each nation should be represented by a magnificent band, in the full uniform of the country to which it belongs, which would suffice to this great conglomeration of choral governments to this, the first International Musical Festival, the first Peace Jubilee of all nations held. Upon the day dedicated to any particular nation, the band of that nation would be the chief attraction, and in the course of the day, exercises be marched in the front of the platform to play its part alone to receive such a welcome, such an ovation as would convince the country that America at least deserves to be on terms of equality with all the world.

After the band has played, a selection of its members, amounting to a thousand voices, the 2,000 voices, the 2,000 instruments, and all the elements of harmony combined, will give the national air of the country it represents, as a compliment from America to that nation.

What choirs would greet the appearance of a magnified American band, a British, a French, a German, a French, English band, or the splendid Gothic band of musical Belgium? What music they would make! what international harmony such visitors would produce!

The musical people of America, from one end of the continent to the other, are ready for this grand demonstration. In hundreds of cities, towns, and villages, from the Atlantic to the Pacific, they are waiting for the word to organize their best voices, where they are not already organized, and to commence with renewed ardor the study and practice of the music of their land. Friends are pledged that will in the best manner represent the character and compositions of every clime and people.

The note of preparation sounded months ago is already awaking unusual interest at home and abroad. Celebrities of all nations have given their hearty endorsement, and day by day cheering words of encouragement come in from all quarters. Members of the municipal, State and national governments, as also those who by voice and pen and purse helped forward the Jubilee of 1869, are again ready to respond to the call. In this, and all countries, in making the Jubilee of 1872 such an exposition of the divine art, as will raise the standard of music everywhere and be a living honor to all who may in any way contribute to its fulfillment.

Individuals that took part in the Peace Jubilee of 1869, as well as those unable to gain admission to the choirs at that time, are now invited. Twenty thousand books containing the selections to be performed will be furnished free to the singers, and each and all are expected to enter the study and practice of the art, soul, and heart, the coming winter, a thorough study and practice of the sublime music.

Thousands of hearts and homes will be made happier anticipating this great event; the musical world will look forward to it with deep interest; and when time has opened the grand chorus of twenty voices, shall we sing the "Hymn of Peace," and to this chorus the harmony of two thousand performers and the bands of all nations shall be added, such a volume of song will be heard, such a perfect and powerful concert of voices and instruments as never before went up from earth to heaven?

THE VICTORIA LEAGUE is an association now organized, equipped, and in working order, having its headquarters in New York, and its co-operative agencies in Boston, Philadelphia, Cincinnati, Chicago, and other cities. The League's mission is to unite the progressive portion of the American people into a new political organization, or body of voters, called The Equal Rights Party, consisting of Both Sexes, and founded on the Constitutional right of suffrage which the Fourteenth and Fifteenth Amendments vest in women as well as men.

It demands, and will support, and expects to elect, as the next President of the United States, by the combined suffrages of men and women, in 1872, Mrs. Victoria C. Woodhull.

THE FOOD QUESTION—We are happy to announce the reception of an article bearing upon the food question by a lady from Mrs. L. W. Tuck, of South Weymouth, which we print, containing the subject in a very simple and forcible manner. As she has given much attention to these questions, we doubt not our readers will be not only interested, but instructed by her contributions. No. 1 is here presented under the head of

Grocery Gems.

"He, lo! did lake undaken bread, and they did eat." To the various kinds of food, cakes, &c., Man, whose more important the bread which has been aptly called "the staff of life." To know of what material to make it, and how, when made, to have it most nutritious, constitutes one of the highest accomplishments in cookery. Of the various grains out of which bread is made, there is none which, by the elements that make it up, is so well adapted to serve human uses in the highest degree, as wheat.

The question is often asked me, "Mrs. T, please tell us how to make unleavened bread?"—Yes, with pleasure; I am happy to assist you in this, giving a more natural way of living. First, a good material, (i.e.) sparkling, soft flour; then, fresh ground Graham flour, (I don't warrant good graham made of Graham flour that has been kept in store three years.) If no course, it will cause irritation of the bowels, it is generally necessary. Second, get a set French bread Pans; these are made of cast iron, and contain a set, a dozen cups, each holding a cake. They should be set upon the stove, warmed slightly, with the fresh bread, then heated very hot, and the cakes will drop out in. The stir Graham into the bread, and after making a batter a trifle thicker than for griddle cakes, using your own judgment, as flour swells more less. Drop from a spoon into the already heated cups of the bread pan, in a low oven, about 25 degrees; when done, arrange them top down, taking care that they one does not rest upon another, that they be not heavy.

It is the best time to take a supply for the day, 10 or 15 minutes heating is an improvement. If you wish them warm for supper, put them between two plates, warm quickly, yet gently, and they will be delicious. I assure you.

BASEBALL—The Howard Jr's. and Actives play a game to-morrow, on the Park in South Weymouth.

The Flyfields and Lightfoot's, played last Saturday on the grounds of the F. & W. Weymouth. The score stood 30 to the F's., and 28 to the L.

THE HAPPY DADS AND CRUSTY UNCLE'S AGAIN.—The above famous Hall fathers will play a match game on Saturday, Aug. 12th, on the grounds in rear of old school house, Front St., Weymouth Landing, to be called at the "Happy Dads." The game will be on the above occasion by Martyn, the celebrated pitcher of the "Eckfords," of New York, who started the "Martial," of that city, on the 4th of July, of which game the *Sun* says, "If any one had said that the Mutuals would have suffered a genuine Chicago defeat in the hands of the happy old Uncle's, he would have been compelled to admit it was a fit subject for the Islandion, if he had said that the Eckford Club, which contained three of last year's Mutuals, who were not good enough for them this year, would Chicago them, he would have been compelled to admit it was a fit subject for the Islandion, if he had said that the Eckford boys administered to the Mates, and that, too, by superior play both at the bat and in the field. Martyn has always had the reputation of being a good player, and his playing the Mutuals in the Mutuals' last match, he has then supplied with a strongish description. Such a defeat, however, did the Eckford boys administer to the Mates, and that, too, by superior play both at the bat and in the field. Martyn has always had the reputation of being a good player, and his playing the Mutuals in the Mutuals' last match, he has then supplied with a strongish description. Such a defeat, however, did the Eckford boys administer to the Mates, and that, too, by superior play both at the bat and in the field. Martyn has always had the reputation of being a good player, and his playing the Mutuals in the Mutuals' last match, he has then supplied with a strongish description. Such a defeat, however, did the Eckford boys administer to the Mates, and that, too, by superior play both at the bat and in the field. Martyn has always had the reputation of being a good player, and his playing the Mutuals in the Mutuals' last match, he has then supplied with a strongish description. ITS CURE AND ITS PREVENTIVE,

By J. H. SCHENCK, M. D.

Many a human being has passed away, whose death

there was no other reason than the neglect of known

and known remedies. Many a human being, whose

dear to family and friends are sleeping the dreamless

slumber into which he has been led by the

neglect of known and known remedies.

It is not unusual, that when

ever a sufficient supply remains that vitality, it is

neglected, and the result is death.

It is not unusual, that when

ever a sufficient supply remains that vitality, it is

neglected, and the result is death.

It is not unusual, that when
